

Session Program

18-21 May 2026

6th CEN Conference

Censored data 2

Tuesday 19 May

13:45

Censored data 2

Session | Location: Room 13 B | Convener: Sarah Friedrich-Welz

13:45-14:03

mRNA COVID-19 vaccination in pregnancy and risk of pregnancy loss: a progressive multistate model to account for time-dependent exposure

Speaker

Lukas Lohse

14:03-14:21

Estimating a treatment effect for survival when membership of the target population is partially hidden

Speaker

Marilena Müller

14:21-14:39

Comparison of survival outcomes with a partly unknown, time-dependent, exogenous treatment - a problem in paediatric SCT-studies

Speaker

Martina Mittlböck

14:39-14:57

Detecting Early and Late Divergences in Survival Curves Using Nonparametric Effect Measures

Speaker

Jonas Beck

14:57-15:15

Evaluation of Z-tests to compare fixed time survival probabilities using stratified Kaplan-Meier estimates with different variance estimators and weights

Speaker

Hannes Buchner

15:15
