

BioEM 2025

Thursday 26 June 2025

Workshop 4: Electromagnetic Fields at the workplaces: advancements in exposure assessment, risk evaluation and health studies - Les Dortoirs (16:30 - 18:00)

-Conveners: Simona D'Agostino; Alberto Modenese

time	[id] title	presenter
16:30	[366] Workers with pacemakers or implantable defibrillators exposed to EMF: practical example of the risk assessment and challenges posed by new EMF sources	MATTEI, Eugenio
16:45	[367] Military personnel exposure assessment from vehicular antennas	COLELLA, Micol
17:00	[368] Occupational EMF exposure in Australia: Protection of workers and research into health effects	KARIPIDIS, Ken
17:15	[369] Comparison of INTEROCC RF-JEM estimates with personal full-shift measurements for 22 occupations in the Spanish and French workforce	TURUBAN, Maxime
17:30	[370] The parameterisation of short- and long-term dynamics of workers' exposure to low frequency EMF when evaluating health and safety hazards, or the applicability of reducing exposure	KARPOWICZ, Jolanta
17:45	[371] Occupational exposure to electromagnetic fields: workers at particular risk and indications for health surveillance	GOBBA, Fabriziomaria
